

MAPP Schedule F for the Miles City, Rapid City, Sidney, SPC, and Stegall Ties

A MAPP Schedule F reservation is all that is required for reserving transmission across the Miles City or SPC ties.

MAPP Schedule F may be reserved to the east side of the Rapid City, Sidney, or Stegall ties

A separate transmission reservation from the Rocky Mountain Region of Western Area Power Administration (WACM) is required for service to the west side of the Rapid City and Sidney ties and from Basin Electric Power Cooperative (BEPC) of the Stegall tie. In addition, transmission must be purchased from BEPC, (per their joint Westside Tariff with Black Hills Power), for use of the Rapid City tie.

BEPC & WACM transmission customers may obtain information at: <http://www.oatioasis.com/>.

For questions regarding the Miles City or SPC tie, contact the MAPP Transaction Coordinator at (651) 632-8508. Questions on purchasing service across the Rapid City, Sidney, or Stegall tie, should be directed to the appropriate Transmission Provider.

All Schedule F service reserved to/from these points must include the appropriate MAPP control area (NPPD or WAUE) on the NERC tag.
