3	Conditional Firm MAPP Schedule F and MAPP Member Tariff Reservations	6
4	Evaluation of MAPP Schedule F or MAPP Member Tariff Service.....	6
4.1	Queued On or After May 16, 2006 at 10:00 CST [Implementation Date]	6
4.2	Queued Before May 16, 2006 at 10:00 CST [Implementation Date]	6

1 Introduction

This document contains the business practices to be used to migrate transmission service requests into the queue due to the expected change of the posted MAPP flowgate AFC values and the implementation of honoring flowgate allocations (Available Share of Total Flowgate Capacity). The expected change of the posted MAPP flowgate AFC values may be due to counterflow assumptions for firm transmission service, dynamic generation-to-load impact calculation, expanded transmission reservation (MISO, PJM and SWPP) data set, and the on/off path evaluation methodology. The expected change in MAPP flowgate may result in a change evaluation results due to the different flowgate AFC values.

MAPP Policies and Procedures for Transmission Operations: Appendix F: MAPP Regional AFC/ATC/ASTFC Calculation and Request Evaluation Process describes the MAPP AFC/ATC/ASTFC calculation processes.

2 MAPP Schedule F and MAPP Member Tariff Transmission Service Requests and Reservations

2.1 MAPP Flowgate AFC

All MAPP Schedule F and MAPP Member Tariff transmission service requests and reservations will decrement MAPP flowgate AFC based upon the On/Off path methodology described in the Appendix F of the MAPP Policies and Procedures.

2.2 MAPP Contract Path ATC

All MAPP Schedule F and MAPP Member Tariff transmission service requests and reservations will decrement MAPP Transmission Provider contract path ATC based upon how service is decrements the contract path prior to the migration.

2.3 MAPP Flowgate ASTFC

All MAPP Schedule F and MAPP Member Tariff transmission service requests and reservations will decrement MAPP Reciprocal Flowgate ASTFC based upon the allocation factor determination methodology describe in the Appendix F of the MAPP Policies and Procedures.

3 Conditional Firm MAPP Schedule F and MAPP Member Tariff Reservations

All MAPP Schedule F and MAPP Member Tariff conditional firm transmission service will remain in effect until the service terminates, even if flowgate AFC values during the reservation's conditional time period after the implementation are positive. Conditional firm transmission service is service approved with an approved flowgate redispatch plan.

4 Evaluation of MAPP Schedule F or MAPP Member Tariff Service

4.1 Queued On or After May 16, 2006 at 9:40 CDT

All transmission service queued after May 16, 2006 at 10:00 CST shall honor the posted flowgate AFC and ASTFC values and the contract path ATC values per the MAPP Policies and Procedures dated May 16, 2006.

4.2 Queued Before May 16, 2006 at 9:40 CDT

MAPP Schedule F and MAPP Member Tariff transmission service requests (queued, received, study, rebid) will be administered according the posted request evaluation results posted at <http://toinfo.oasis.mapp.org/oasisinfo/>
